25X1A9a

1. Informed DCI that [REDACTED] had initiated NIE 55/2 relating to the outlook in Korea.

Following the Deputies' meeting, spoke to [REDACTED], and subsequently to [REDACTED] on the difficulties of coordination of DD/P-DD/I Offices. In my conversation with [REDACTED] I suggested that we adopt the technique employed in setting up [REDACTED] position as Deputy to [REDACTED]. By agreement between DD/P and DD/A, DD/P has a Deputy agreeable to both parties who supervises administrative support in the DD/P complex and consults on a relatively continuous basis with DD/A or his Deputy. Accordingly, I suggested that [REDACTED] add to his Deputies (P&P, FI, etc.) a Deputy for Intelligence who would:

- a. Supervise intelligence support for DD/P.
- b. Work out appropriate arrangements to insure coordination with DD/I Offices on all matters not exclusively of covert interest.
- c. Arrange for an appropriate interchange of information and support between the DD/P and DD/I complexes.
- d. Insure that DD/I interests overseas, particularly in the intelligence staffs of the Senior Representatives, were adequately recognized.

I informed [REDACTED] that I felt that the DD/I complex had an adequate justification for Strategic Division and Scientific Division under [REDACTED] that was apart from, and independent of, any justification for those units as elements of the [REDACTED]. Accordingly, I felt that DD/P and DD/I should both deal directly with DCI and the Senior Representative in working out the T/O for these units. Hitherto this matter had been dealt with too exclusively by the EEDesk people who could not and did not appreciate the justification on behalf of the DD/I complex. At any rate, they did not effectuate such interest. [REDACTED] concurred in the appointment of such a Deputy so long as he was agreeable to both of us and would be presumptively agreeable to both sides of the shop. [REDACTED] also recognized our interest in T/O intelligence staff etc., e.g., all overseas units performing an overt function.

As a separate and incidental matter, I pointed out to [REDACTED] that the recent [REDACTED] paper should have been coordinated with me. I felt that the justification therein set forth could be misinterpreted. The suggestion that the T/O for [REDACTED] be considered separate and apart from that of the [REDACTED] was agreeable, but I felt that it should be supported as a CIA project and would also have to have some relations with Scientific Division [REDACTED]. At [REDACTED] request, I undertook to have this memorandum rewritten.

25X1A9a

3. Attended IADs meeting. [REDACTED] is preparing a separate minute to cover this.

(CONT'D.)

Official Diary
Thursday, 8 January 1953

25X1A6a

4. Lunched with Park Armstrong and reported to him generally on the impressions ~~we~~ had received respecting State activities on my recent trip. Raised with Mr. Armstrong the question of coordination of overt collection activities overseas and at that time he indicated to me that he was considering sending a man to [redacted] to survey the intelligence liaison opportunities there. I told him that such a proposal would undoubtedly be viewed with reserve by the covert offices of CIA who would be concerned that a State representative would be engaged in covert activities. This required a very clear understanding of the functions to be performed by such State representatives. I did feel, however, that if Mr. Armstrong and myself could have a clearer understanding as to our respective functions in the field of research, I would not oppose such State activities overseas. I might even be able to afford them some support. There would be areas in which I would desire to send CIA representatives and I believed that he would recognize the desirability of that, in the light of the local situation, and the particular function to be performed. An example would be a man sent primarily to coordinate scientific collection.

5. Mr. Armstrong expressed a concern at the fact that State's views respecting the NSA reorganization were not being adequately recognized by the ad hoc committee. His concern arose from his feeling that now was the time to insure that the deadening practices of the past were thoroughly rooted out. I expressed agreement with the principle and undertook to look into the facts.

6. At my meeting with [redacted] I informed him of Mr. Armstrong's intention to send a representative to [redacted] and indicated that he considered his attitude toward such overseas representatives of the intelligence area of State. As respects [redacted] he did not feel that there would be any conflict between an intelligence liaison and a covert liaison [redacted] There were two other possibilities: 1) [redacted] might want to broaden the charter of his own representative to include intelligence liaison, or 2) He might prefer to have a CIA intelligence representative. This type of question would come up increasingly in the future and we should begin thinking of our policy line which might not be the same in every area.

7. Mr. Amory reported orally respecting the NSC Senior Staff meeting on the Oil paper and this will be supplemented by a written report for DCI.

25X1A9a

25X1A9a

8. Discussed with [redacted] the fact that decisions and negotiations respecting the T/O for non-covert activities of [redacted] e.g., Strategic Division, Scientific Division, etc.) were being carried on by EE Division of DD/P without sufficient recognition of the interest of DD/I Offices in these activities. [redacted] assured me that no decision would be made on these T/Os nor would any recommendation be made to the Director respecting it without my concurrence. Upon reading [redacted] diary, respecting his discussions with [redacted] of EE (who went so far as to state that when the final reduction was made in [redacted] the Strategic Division [redacted] would not even be carried on the [redacted] but would be transferred to Army or State), I informed [redacted] of my discussion with DD/A and requested that he conduct future discussions in accordance with this information. Also informed [redacted]
